Education in Benin

Benin's education system is a state of change. In 1989, the education system was in a state of collapse. It was only in the late 1990s that the system began to show signs of improvement. The government has made significant investments in the education sector, and the country has seen a steady increase in enrollment and literacy rates.

Contents

- 1 Overview
- 2 Education system
- 3 Higher education
- 4 Vocational training
- 5 Distance education
- 6 Early childhood education
- 7 Early primary education
- 8 Secondary education
- 9 Tertiary education
- 10 International comparisons

History

The Benin education system is a state of change. In 1989, the education system was in a state of collapse. It was only in the late 1990s that the system began to show signs of improvement. The government has made significant investments in the education sector, and the country has seen a steady increase in enrollment and literacy rates.

School system

The Benin education system is a state of change. In 1989, the education system was in a state of collapse. It was only in the late 1990s that the system began to show signs of improvement. The government has made significant investments in the education sector, and the country has seen a steady increase in enrollment and literacy rates.

Enrollment

The Benin education system is a state of change. In 1989, the education system was in a state of collapse. It was only in the late 1990s that the system began to show signs of improvement. The government has made significant investments in the education sector, and the country has seen a steady increase in enrollment and literacy rates.
